			POL—02	Rev. 0
	Intocmit	Aprobat	Valabil din data: 06.11.2023	
	Proprietar proces	Director General		

We are engaged in promoting a sustainable, balanced and responsible activity, both from an economic, social and environmental point of view.

We take responsibility to protect the environment, to monitor and promote the reduction of consumption of natural resources and to support the community in which we operate.

In line with our commitment to continuous performance improvement, we ensure that all our processes and activities – **trading activities for industrial products: bearings, power transmission elements, etc.** – comply with applicable regulations and environmental standards.

The main commitments are:

- environmental protection, including pollution prevention
- fulfilling obligations to comply with applicable regulations, legal requirements and other requirements
- continuous improvement of the environmental management system in order to increase the environmental performance

This environmental policy represents **management's commitment** and is available to employees and visitors both at the premises and at the workplace.

If there are documented (written) requests, this quality policy can also be communicated to other interested parties – customers, suppliers, neighbors, authorities, etc.

# Objectives 2023

Kpi	Year-Semester			Evolution (%)	Target 2023
	2022-S1	2022-S2	2023-S1		
Electrical energy consumption (kWh) / sold piece	0,013284	0,017762	0,012069	-9%	0,011465
CO2 emissions (tons) / sold piece	0,000013	0,000017	0,000011	-11%	0,000011
Recycled waste (kg) / sold piece	0,002308	0,006864	0,001913	-17%	0,001818
Recycled packaging (kg) / sold piece	0,003359	0,003157	0,002771	-17%	0,002633
